***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 33-43, the prior art fails to teach or suggest a method of selective data transmission comprising transferring membership table information from a first wireless access point to a second wireless access point when the at least one recipient roams between respective access points, the step of transferring comprises "issuing a general query from the at least one recipient to the second wireless access point, for soliciting membership report messages from the second wireless access point," which is considered in combination with other limitations, as specified in the independent claim 33.

Regarding claims 44-53, the prior art fails to teach or suggest a method of selective data transmission comprising transferring membership table information from a first wireless access point to a second wireless access point when the at least one recipient roams between respective access points, wherein the transferring comprises IGMP snooping on associated Ethernet bridges and switches; wherein the membership table is maintained on a wireless access point for forwarding the identified data packets to the at least one recipient; and "wherein the second wireless access point generates a proxy IGMP membership message to the at least one recipient to update membership table information," which is considered in combination with other limitations, as specified in the independent claim 44.

Regarding claims 54-64, the prior art fails to teach or suggest an apparatus for selective data transmission comprising means for transferring membership table
